- Development tools such as Webpack, NPM, and Babel.
- Testing tools such as Jest, Selenium, and Katalon.

## EXPERIENCE

---

### **Chithub Technologies** – Senior Frontend Engineer

**February 2023 – Present**

- Develop and maintain a suite of high quality web applications for Road Traffic Management with React & Typescript.
- Design the UI for the web applications.

### **Farmgirl Flowers** – Senior Frontend Engineer

**Aug 2022 – February 2023**

- Develop and maintain a web application using React on Rails and SCSS, collaborating remotely with a team to interpret requirements and produce interfaces for internal tools.
- Migrated the web application from haml to react which improved customer engagement by 25% and also flower sales.

### **FundMyLaptop** – Project Team Lead and Frontend Developer

**Jan 2020 – Present**

- Serving as the project team lead, product lead, frontend developer (using React) and part-time UX/UX designer for FundMyLaptop, a platform that allows users to raise funds via crowdfunding or loans for the purchase of brand-new or used laptops.
- Led a team to develop and launch a premier crowdfunding startup, captivating over 3,000 global users, and igniting a surge in customer engagement and sales.

### **Reliance HMO** – Frontend Engineer

**Oct 2021 – Sep 2022**

- Successfully built the KPI management application for the internal staff using React, Redux, CSS, and some PHP.
- Setup a configuration to reduce merge conflict issues by over 75% and improve deployment delay time.

### **Chithub** – Frontend Developer

**Jan 2021 – Oct 2021**

- Successfully implemented solutions such as easy access to data of car owners and drivers, ability to find a defaulter and have it on record, and ability to send out emergency signals in case of car theft or defaulter escaping after breaking traffic rules with React, Typescript, CSS, and Figma.
- Successfully improved accountability and management of funds (fines) for traffic management officials in Nigeria.

### **Flexipgroup Technologies** – Frontend Engineer

**Apr 2019 – Dec 2020**

- Developed and maintained the frontend of the Konnectore social media application using React, contributing to the creation of an online platform for upcoming entertainers to connect with fans and showcase their talents through an annual competition as a junior frontend developer and QA.

## EDUCATION
